

Wire Rope Safety and Reliability

Who we are

The Company is a Lifting Equipment Engineers Association (LEEA) and National LA-LPK accredited training provider and is also Construction Industry Training Board (ECITB) approved.

Our training programs follow: -

- *British and European Directives,*
- *American (ASME/ANSI and API) standards.*
- *International Marine Contractors Association (IMCA)*
- *Engineering Construction Industry Training Board (ECITB)*
- *Lifting Equipment Engineering Association (LEEA)*
- *Original Equipment Manufacturers (OEM) standards., and*
- *International standards (ISO)*

The company was established in 2012 and is devoted to develop people working within engineering construction industries.

The founder and Director, Mr. David Vickress has been involved in Training development for major companies in the world.

Our Mission

Our mission is to help professional people, those responsible for engineering and construction operations and all who work within them. We will help them to perform to the best of their ability and to make informed choices to improve their working environment whilst maintaining safety.

PT Wire Rope Training and Consultancy is devoted to developing wire rope and lifting gear specialists, managers and inspectors.

Wire Rope Safety and Reliability

Our Flagship courses are world famous

The Wire Rope Inspector programs were developed in the 1990's. Certification is internationally recognized.

Lifting Operations and Engineering Support

Lifting and support functions with international qualification is our specialty. Scaffolding, rigging, moving loads and basic welding; all with international certification.

Safety

Safety is paramount, all our programs are directly or indirectly related to the ECITB International Health and Safety Passport.

Trainer Training

We can train instructors to deliver any subject related to our portfolio; whether that be for Safety, Lifting Operations or Construction Engineering. To UK CIPD standards

*We are good at what we do,
can you say the same?*

Wire Rope Safety and Reliability

List of other available courses

- Wire Rope Inspector (Levels 1, 2 and 3)
- Lifting Gear Inspector
- Wire Rope (Resin) Socketing
- Scaffolding (Basic, Advanced, Supervisor and Inspector)
- Rigger (Safe Lifting) Basic, Advanced and Supervisor
- Lifting Supervisor and Appointed Person
- Safe Use of Lifting Equipment (cranes, MEWPs, Overhead etc.)
- ECITB International Competency Engineering/Construction Level 1
- Working at Height
- Risk Assessment
- Environmental Awareness
- ECITB International Health & Safety Passport (Foundation, Advanced, Supervisor)
- Train the Trainer

International Competency Technical Assessments

- Non- Critical Welding
- Electrical Installation and Maintenance
- Mechanical Installation and Maintenance
- Many Engineering Construction Disciplines

Trainers and Specialists

We are always looking for more expertise, continuity and expansion. If you are a freelance instructor or operate/train in a specialist subject closely related to our portfolio, we would love to hear from you.

All training is customizable, available at your site or at one of our venues in Batam. Ask for details or visit our website www.wireropetraining.com
